

SANDEEP YADAV

MERN Stack Developer | Full Stack Web Developer

sandeepyadavtheking@gmail.com | +91 9451421048 | [GitHub: sandeep-yadav-94](#)
[LeetCode: sandeep_94](#) | [GFG: samdeepyads5xi](#) | Hāthras, Uttar Pradesh, India

SUMMARY

B.Tech CSE undergraduate (3rd year) with hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js) and real-time communication systems. Solved 130+ problems on LeetCode and 55+ on GeeksforGeeks, with strong fundamentals in DSA and problem solving. Passionate about building AI-integrated applications and open-source contribution. Seeking Software Development Internship / Placement opportunities.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, C, HTML5, CSS3
- **Frontend:** React.js, Redux, Bootstrap, Tailwind CSS, Responsive Web Design, DOM Manipulation
- **Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, JSON
- **Database:** MongoDB, Mongoose, MySQL (basics)
- **AI/ML Tools:** Ollama (local LLM inference), Prompt Engineering, Python-based LLM integration
- **Other Frameworks:** Django (basics)
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, npm/yarn, Vercel, Netlify
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Soft Skills:** Problem Solving, Team Collaboration, Agile Basics, Communication

PROJECTS

Hirevix — Live Video Interview & Meeting Platform

Tech Stack: React, Node.js, Express.js, MongoDB, Socket.io

- Built a real-time video calling web application (Zoom-like) enabling live interviews and virtual meetings between multiple participants.
- Implemented a full MERN stack architecture with a React frontend, Express/Node.js backend, and MongoDB for user and session data.
- Used Socket.io for real-time, low-latency communication between participants, aimed at streamlining remote hiring and interview processes.

Param Mitra — Offline AI Chat Assistant

Tech Stack: Python, Ollama (local LLM), Django

- Built a personal AI assistant that runs a large language model fully offline using Ollama, removing dependency on cloud APIs.
- Designed the assistant to converse casually in Hindi, like a close friend ("Param Mitra"), for a natural and relatable user experience.
- Used Python for LLM integration and Django for the application layer, handling conversation flow and responses.

EDUCATION

Invertis University — Bachelor of Technology (B.Tech), Computer Science & Engineering

3rd Year, 5th Semester (Currently Pursuing)

CODING PROFILES & ACHIEVEMENTS

- **LeetCode:** Solved 130+ problems, strengthening core DSA and problem-solving skills — [Profile Link](#)
- **GeeksforGeeks:** Solved 55+ problems across data structures, algorithms and core CS concepts

ADDITIONAL INFORMATION

- Active open-source contributor with 10+ public repositories on GitHub covering web development, AI, and academic projects.
- Strong interest in IoT and AI-based applications alongside full-stack web development.
